A Better System for Any Manufacturer

Why manufacturers choose Cetec ERP

01 All-in-one Manufacturing Platform

A complete system to manage all aspects of your business. Configurable out-of-the box for any manufacturer - flexibility to build your way.

02 BOM Revision Mgmt

Manage BOM revisions w/ labor and docs. Control changes with ECOs that freeze related work orders. Import BOMs via csv or excel.

03 Inventory Mgmt & Traceability

Real-time inventory management. Track every lot and serial through production, assemblies, and shipments.

04 Production Tracking & MES

Keep production on track with labor plans, required signatures on work instructions, and detailed work order history—all accessible in real time.

05 Built-In CRM & Sales

Manage customer records, leads, quoting, and sales orders in one system. Track and manage RMAs and customer complaints.

06 Integrated Quality & Compliance Mgmt

QC inspections built into production & receiving, integrated into QA/QMS compliance requirements. (NCR, CAR/PAR, Supplier, etc)

07 Barcode Scanning

Leverage barcode scanning for inventory control and shop floor tracking for efficient, real-time data collection

08 MRP & Supply Chain Mgmt

Real-time MRP tools to align production schedules with material availability and demand.

09 Mfg Cost Accounting

Detailed tracking of all manufacturing costs provides insights into job profitability and helps manage estimates versus actuals effectively.

10 Web-Native & Flexible Implementation

Run the entire business on an easy to use, web-based platform. Get up and running quickly with no upfront costs. Self-paced or expert-led setup.
